Referencing basics

— All information should be checked against journal websites and citations corpora. Any format inaccuracies may impede the cited sources' tracking in databases, impacting the authors' citation rate.

— Only include indispensable information. Specifying whether the source is a textbook, a course book or a monograph is unnecessary. However, you may include the type of source if it contains additional information, e.g.: "*Psychology of Physical Culture and Sports: A Textbook for Higher Education Institutions in the Area of Physical Culture.*"

— Conference proceedings may be published by the organisers independently, in which case the place of publication, publisher and the year of publication may be unspecified. The conference title, city, and date must always be provided.

— Journals normally list the volume number and add the issue number in brackets: 13 (6). If you are referencing a Russian-language journal, please use more specific notes (e.g. vol., iss.) for better clarity.

— When citing a source with two, three or four authors, all authors' names should be included. When citing a source with more than four authors, only the first three names should be listed, followed by "et al." A space should be inserted between initials. Use commas to separate last names and initials.

— Edition details should be included, e.g. "3rd ed., revised and expanded". When citing a later edition, only provide data on the cited edition, without referencing the first edition.

— The original language and the name of the translator need not be specified.

— When citing online sources, provide the complete URL.

— Always include DOI, if available. PMID should also be mentioned.

— Journal titles should be provided in full.

— For pages, en dashes (–) should be used, rather than hyphens (-).

Transliteration of references

— If you reference any Russian-language sources, please use the translitonline.com website with the following settings:

ë — e;

ц — ts;

й — j;

щ — shch;

ий — ij;

ый — yj;

х — всегда kh (always kh).

Authors' names in Cyrillic characters should be transliterated into English; authors' names in Latin characters should be provided in their original spelling: Ariès, Børglum, Büchner, Janáč, etc.

— For articles that were originally published in languages other than English and were later translated into English, only use the English name, e.g.: Born, M., Wolf, E. (1973) *Principles of optics*. 2nd ed. Moscow: Nauka Publ., 719 p. (In Russian)

— For journals in languages other than English, please only state the translation of the journal title if it is the official translation recommended by the publisher. If there is no translation provided by the journal, only use the original name. If the original is in non-Latin characters, please transliterate it. The translation of journal title can be found in a printed issue (front page, header), on the journal website or in academic databases.

— If the journal is published both in English and non-English versions, and you are referring to an article in the non-English version, only provide the original title of the journal, omitting the translation. If a journal does not have an official translation of the title, but is known in international databases under a transliteration, please use this transliteration to refer to it.

— You can often find the translation of an institution's name on its website, in its charter or in an academic database. If there is no official translation, please use the original (if the original is in Latin) or transliterated name of the institution, e.g.: «М.: ЦНИИ Главохоты РСФСР» = “Moscow: TsNIL Glavokhoty RSFSR”.

— Nouns, pronouns, verbs, adjectives and adverbs are (not prepositions, articles or conjunctions) are capitalised in the titles of journals and institutions: *Physical Review Letters*, Lomonosov Moscow State University.

— When transliterating a title, please keep the original punctuation (e.g. *Vestnik Sankt-Peterburgskogo universiteta. Seriya 9. Filologiya, vostokovedenie, zhurnalistika*).

Standard terms and abbreviations

Source (book)	In: [Book]
Page/Pages	p. or pp. [space after the full stop]
Volume	vol. or vols.
Number	no. [space after the full stop]
Issue	iss.
Part	pt
Chapter	chap.
Edition	ed. or eds.
And others	et al.
Numbered Edition	2 nd ed. / 6 th ed.
Revised Edition	Rev. ed.
No date of printing	s. a.
No place	S. l.
No publisher	s. n.
Other Terms	Special issue
	Special section
	Abstracts of papers
	Proceedings of the Conference <Name>
	Proceedings of the 3 rd International Conference / Symposium / Congress...

Standard reference format

The basic format is as follows: (1) Author's last name, initials. (2) Year published. (3) Title of the article. (4) Title of journal/other source. (5) Publication details. (6) Publication language.

The format for other non-English sources in languages that use the Latin alphabet is as follows: (1) Author's last name, initials. (2) Year published. (3a) Original title of the article. (3b) [The translation of the article title into English in square brackets]. (4a) Original title of journal/other source. (4b) [The translation of the journal/source title into English in square brackets]. (5) Publication details. (6) Publication language.

The format for non-English sources in languages that use the Cyrillic or other alphabets is as follows: (1) The transliteration of the author's name. (2) Year published. (3a) The transliteration of the title of the article. (3b) [The translation of the article title into English in square brackets]. (4a) The transliteration of the title of the journal/other source. (4b) [The translation of the journal/source title into English in square brackets]. (5) Publication details. (6) Publication language.
